The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 4-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 4, the preamble should be rephrased so that it can be consistent with the preamble in claims 1-4. In line 5, applicant should define what applicant intend by "its front side." what is its?

Claim 5, lines 3 and 10, it is unclear whether "a connector" to be the same as "a connector" in line 1. In line 10, there is no antecedent for "a front side of said connection." Does applicant intend by a front side of the connector?
